HERRERASAURUS

1 metre

3 feet

Herrerasaurus (eh-RAY-rah-SORE-us)
“Herrera’s lizard”

Period: Late Triassic

Length: 10 feet (3 metres)

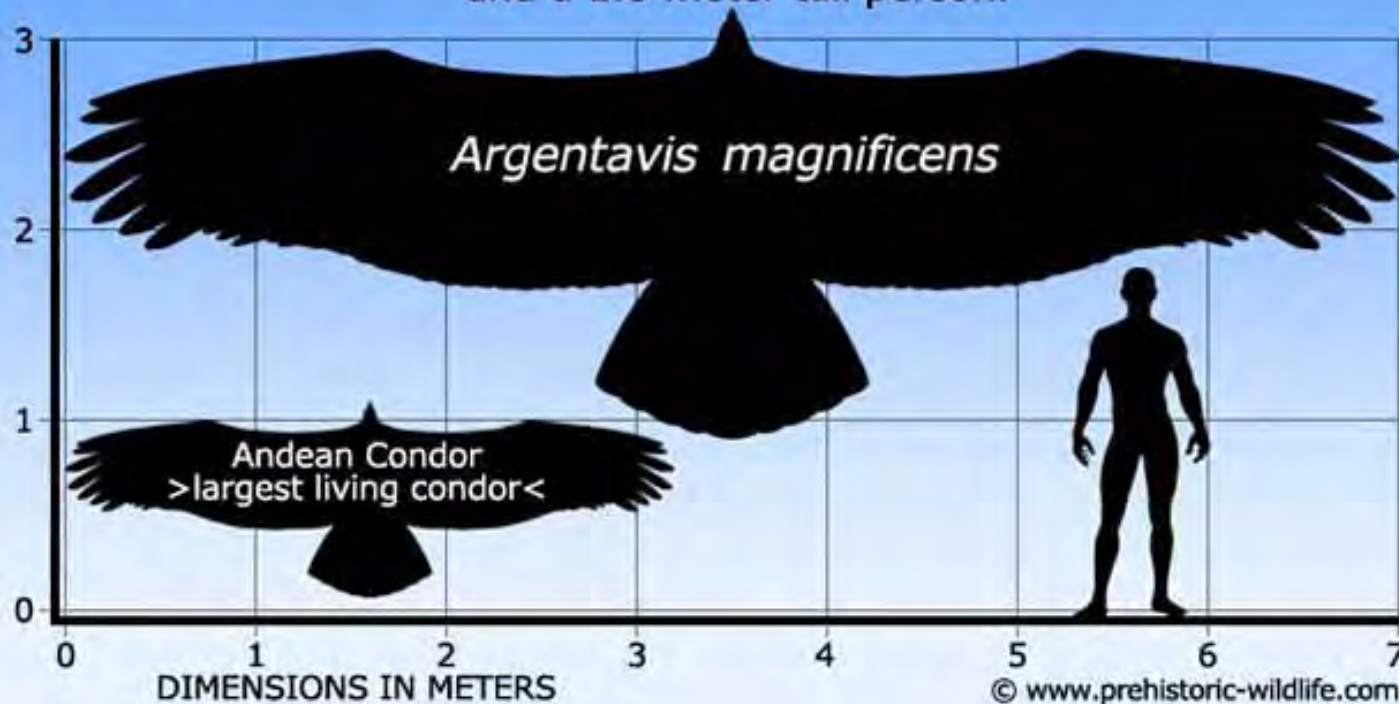

Location: South America

One of the earliest known dinosaurs, it was an agile predator with strong, clawed hands for grasping prey.

Eoraptor

Argentavis compared with a large Andean Condor (*Vultur gryphus*) and a 1.8 meter tall person.
